

AASHTO SPECIFICATION EXCEPTIONS

Revised: 1-May-06

AASHTO T-168-03

SAMPLING BITUMINOUS PAVING MIXTURES

EXCEPTIONS

The purpose of this specification is to incorporate local practice exceptions to the nationally accepted AASHTO standard. The AASHTO specification shall be adhered with the exception of the following:

Note: The majority of this specification uses the ASTM D 979-01, thus the below numbering will comply with the same.

Section 5 Procedure

Subsection 5.2.1 sampling from the conveyor belt. In lieu of stopping the conveyor belt, a calibrated sampling device may be used.

Subsection 5.2.3 sampling from roadway prior to compaction. Follow the specification with exception that the samples are to be taken from the auger area of the paving equipment.

Subsection 5.3.1 number of Field Samples. In lieu of this subsection, use the RTC Uniform Standard Specifications and contract special provisions.
